

← Look like Google maps

Risk-only visualization colored bursts indicate areas w/ harmful decibel levels (or we could do a visualization where we color the entire map according to the avg decibel lvl in that area and colors just fade into one another)

Date, time, location of selected point

nice color background

dB level of selected point

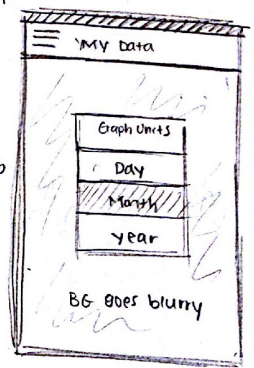

STARTS AT 12AM

ENDS AT 12AM

Slider you can use to change duration of graph.

Slide to change linearly in terms of the current unit (days). Hold down thumb on slider to open up unit-changing window.

Hold thumb on slider
